**Watch the video about the 7 types of AI and complete the table:**

| Types of AI | Description |
|-------------|-------------|
|             |             |
|             |             |
|             |             |
|             |             |
|             |             |
|             |             |
|             |             |

**Answer the questions:**

What distinguishes narrow AI from other types of artificial intelligence?

Can you provide examples of tasks that narrow AI excels at?

What are some limitations of narrow AI compared to more advanced types of AI?

**Writing:** Write about the application of AI in my industry (electronics, construction.....) (15 sentences).

Provide examples of how AI is currently being used or has the potential to be used in the industry. Explain why AI is relevant to this industry and its potential impact. Identify and discuss the challenges and obstacles associated with implementing AI in the industry.
